Profile

Software developer. I'm patient enough to take difficult projects seriously, and driven enough to automate tedious, needlessly manual work. In my previous accounting position, I greatly exceeded expectations by teaching myself SQL and relational database theory in order to automate the vast majority of my data entry and data quality tasks, and avoid using a cumbersome GUI. Since then, I spent two years studying math, computer science, and statistics at North Seattle College, attended Code Fellows' Python Development Intensive (taught by esteemed pythonista Cris Ewing), and have independently studied the classic textbook *The Structure and Interpretation of Computer Programs*. Recently, I helped to co-found a local big data/nlp startup, and have been working as a freelance web developer.

Technical Skills

Proficient

Python, Django, Django REST Framework, Flask, PostgreSQL, JavaScript, Vue.js, Git, SQL, HTML/CSS, Unix systems, Bash

Familiar

Webpack, Mocha/Chai, AWS Deployment, Heroku Deployment, Ansible, Nginx, Unicorn, MongoDB, Pyramid, Scheme

Experience

Full Stack Engineer

iDataLabs, Bellevue, WA

2017.01 - present

I built and maintain a Vue.js app to display and sell marketing data; I also maintain and update the consumed api (written in Flask).

- Designed and implemented a store to manage client-side shared state

Freelance Web Developer

Red Mountain Software, Seattle, WA

2016.08 - 2016.10

Designed, built, and tested an internal management application according to client specification. App built with Django and PostgreSQL, with jQuery on the front as needed.

- Designed and implemented database schema
- Wrote models, views, and templates
- Wrote a method to display arbitrary model fields (including reverse relationships) for arbitrary models

Co-founding Software Developer

Sternshus, Inc, Seattle, WA

2016.07 - 2016.09

Provided front-end solutions in the context of rapidly changing business requirements. Worked primarily in Webflow, Django, and MySQL. I am most proud of having written sed and python scripts to automate merging Webflow files into the larger Django project.

Projects

Reciprocity

github.com/TeamReciprocity/reciprocity

2016.04

A full stack Python web application for recipe sharing and collaboration. Built with Django and PostgreSQL, deployed via Ansible to an AWS EC2 instance.

Toy Domain Scraper

github.com/mastokley/toy_domain_scraper

2016.04

Toy web scraper built in Python. Uses breadth-first traversal for fast, reliable results.

HomeQuest

github.com/homequest/homequest

2016.04

A full-stack Python web application to gamify household chores and chore management. Manually implemented authorization, authentication, and row-level security. Built in Pyramid with a PostgreSQL database and deployed on Heroku.

Education

Code Fellows

Certificate

Seattle, WA

2016

Advanced Python development emphasizing test driven development, pair programming, agile methodologies, version control, and basic data structures and algorithms

North Seattle College

Coursework in Math, Computer Science, and Statistics

Seattle, WA

2012–2014

St. John's College

B. A. in Philosophy

Annapolis, MD

2009
